

„With cOPERATOR you can plan and manage complex networks simply and securely! “

**cOPERATOR – The All-In-One Planning Solution** for all areas of combined transport!

Combined transport is characterized by a high degree of complexity due to its numerous interconnections. With our **planning solution cOPERATOR**, you plan and manage the network of your service partners such as railroads, truckers or terminals directly. All service elements are simply interconnected via catkin - you benefit from the automatic transparency gained along the complete supply chain.

In doing so, **cOPERATOR** combines all areas from **scheduling, utilization management** and **commercial processing** to **general communication work** in one cloud application.

## Advantages

### Centrality

cOPERATOR is your central solution for planning & organizing CT networks.

### Customized

cOPERATOR can be individually adapted to specific customer requirements.

### Efficiency

cOPERATOR is directly connected to the catkin ecosystem, which means that a lot of status data is automatically available, which in turn makes work more efficient.

### All-In-One

In cOPERATOR you will find all tasks combined in one application: planning, control, customer bookings, service provider orders, commercial processing etc.

## The catkin GmbH

We have been developing and implementing customized communication solutions in the B2B logistic sector since 2013. With our catkin communication platform, we support industrial and transport companies. With the help of our modern software technologies, our customers redesign their logistic processes in a digital, more transparent, and secure way.
